Torys LLP Implements EOS.Web® Enterprise and EOS e-Library Service®

EOS.Web ASP-hosted solution to provide centralized library management for all offices

(Carlsbad, CA – June 24, 2005) Market leader EOS International announces that Torys LLP, an international business law firm with more than 330 lawyers in New York and Toronto, has implemented EOS.Web Enterprise to provide centralized library management, replacing a system from SydneyPlus.

"I am very satisfied with the implementation process EOS used for the data conversion," says Louis Mirando, Library Director for Torys LLP. "I'm impressed by how easily we've been able to incorporate EOS functionality into our intranet to deliver information to targeted practice groups. We're looking forward to using the EOS.Web Serials module to handle the receipt and routing of electronic issues of serials in addition to being able to provide desktop access to back issues."

EOS.Web anytime, anywhere connectivity enables libraries and information resource centers to provide knowledge workers access to all materials, as if the worker were physically in the library, with the research specialist acting as an 'information mediator' making suggestions, recommendations, and delivering results.

"It is an honor for EOS.Web Enterprise to be chosen by Torys to help them achieve their centralized library automation goals," states Salvatore Provenza, Vice-President of Global Sales and Marketing for EOS International. "We are delighted to have the opportunity to work with them on their content and knowledge management initiatives."

EOS.Web can be installed as a local, in-house, Web-based solution running on a local network server, or hosted at the EOS e-Library Service® global data center, enabling libraries to significantly reduce costs and improve operations.

About EOS International
EOS International is a leading global library information management software and services provider with a client base of over 3,000 special libraries. A client-driven company that has earned the top customer satisfaction award for the past two years and earned a nomination for the Computerworld Smithsonian award, EOS library automation software products (EOS.Web® Express, EOS.Web® Enterprise, and hosted, EOS e-Library Service®) serve the stringent knowledge and content management needs of corporate, legal, medical, government and special libraries of all sizes.
